JOINT MISSION COVERAGE SUMMARY

Mission C 6037
3 September 1959

Summary of Coverage

Mission C 6037, flown 3 September 1959, covered parts of Burma, China, India, Thailand and Tibet. In Tibet, the Lhasa area and the area north of Lhasa along the Tsinghai-Tibet Road were covered. In China the Tsinghai region adjacent to the Tibet border was covered around Golmo Koko Nor (Lake), and Lan-chou and connecting roads. The mission covered portions of Burma, the Assam Province of India, and Thailand, with camera 9 off most of the way; no targets here are reported in this summary.

Quality

Quality of the photography ranges from good to poor. Cloud cover, heavy or scattered, appears in at least one fourth of the coverage, chiefly in the far south portion and along the north limits.

556 Irrawaddy River

677 Gulf of Martaban

Categories

Information is listed by categories, as shown in the Table of Contents. Arrangement within categories is as follows: Airfields and Urban Areas -- alphabetically by (1) country and (2) city or installation; all other categories -- by (1) country, (2) WAC number, and (3) degree square. An index of geographic names follows the text.

Coordinates

Reference to every item by a single pair of coordinates is a matter of convenience in data recall. The coordinates used are those of the southwest corner of the one-minute square in which the item occurs. An exception is made in referring to certain targets, such as roads, where the coordinates of the approximate midpoint are listed in the heading and additional coordinates may be cited in the description.
